

FIRE BLANKET & SMOKE CURTAIN

UNIQUE Fire Blanket & Smoke Curtain

UNIQUE Fire Blanket

Use UNIQUE Fire Blanket to extinguish small incipient fires by placing the blanket over the fire to smother it and cut off oxygen supply. They can also be draped over a person or objects to protect them from being singed or burnt. Made of fire retardant material, UNIQUE fire blankets can continuously withstand operating temperatures of 600°C. They are inexpensive, quick to use and easy to maintain and store.

TECHNICAL DATA					
Code No.	Size(mm)	Material	Colour	Coating Finish	Operating Temperature
FB-4x4	1200 x 1200 (4' x 4')	Woven Fibreglass Fabric	White	Loomstate	Basic Fabric 600°C
FB-4x6	1200 x 1800 (4' x 6')				
FB-6x6	1800 x 1800 (6' x 6')				

UNIQUE Smoke Curtain

UNIQUE Industrial Smoke Curtains have high tensile strength and are used to contain the spread of fire in 'uncloseable' areas, that is, where there are no structures in place (such as doors) to prevent applied fire retardants from escaping. The smoke curtains are inexpensive, rot-proof and non-combustible. The release mechanism for the curtains is operated electrically.
